## **General Safety, Handling & Storage Principles applied to all products.**

### **1. Hazards identification:**

When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EU Cosmetics Regulation).

The following information applies to inadvertent misuse or accidents as well as possible commercial uses.

Irritating to eyes and skin;

Products may trigger an allergic reaction.

### **2. First aid measures in the event of:**

–contact with eyes: rinse thoroughly with plenty of lukewarm water immediately (remove contact lenses first); then consult a doctor (ophthalmologist) without delay.

–ingestion of larger amounts: do not induce vomiting. Rinse out mouth and drink about one to two glasses of water. Where appropriate, consult competent Poison Control Centre or doctor.

–contact with skin: immediately wash off with water and soap; skincare. If skin irritation occurs, consult doctor.

When consulting a doctor or a Poison Control Centre always have packaging or label and possibly package insert available.

### **3. Fire fighting measures:**

All common extinguishing agents are suitable.

### **4. Accidental release measures & disposal considerations:**

In the event of spillage/leakage: mop up main volume with cloths; when larger amounts are involved, dispose of cloths or mopping up material by controlled disposal. Remove rest with water and common cleaning agent. Wear suitable protective gloves (see 5.)

Packaging should be recycled after residual emptying. Filled, unused packages must be disposed of separately in accordance with the waste management directives of the municipality.

### **5. Handling and storage:**

Must be used in accordance with manufacturer's instructions, wear gloves (single-use gloves in accordance with DIN EN 374 of PVC or nitrile).

Avoid contact with textiles.

Observe any warnings on packaging.

Avoid contact with eyes or facial skin.

Reseal container after use. Use immediately after mixing with oxidising agent.

Dispose of any left-over application mixture after completion of colour treatment.

**Store in a cool and dry place (not above room temperature).**

### **6. Other information**

Refer to conditions of use and any warnings on the product or packaging.

For consultation in the event of poisoning, the Poison Control Centres have additional details about the individual products. When consulting a Poison Control Centre always keep packaging or label and possibly package insert available.

**Product Information**

**No. 1 Relaxing Solution**

Product identifier/Trade Name:	<b>No. 1 Relaxing Solution</b>
Intended Purpose:	The product is considered as a "Brow & EyeLash lifting cream". It is intended to be use for eyelashes lifting treatment for eyelashes and for professional use only. For external application only.
Appearance, colour and texture:	Semi-solid,light pink mixture as a cream.
Ingredients:	Aqua, Ethanolamine thioglycolate, Ethanolamine, Urea, Cetyl Alcohol, Glycerin, Niacinamide, Glyceryl Stearate, Theobroma Cacao Seed Butter, Hydrolyzed Silk, Phenoxyethanol, Peg-100 Stearate, Parfum, Biotin, Ethylhexylglycerin
Specifications: pH:	9-9.5 (@ 25°C)
Specifications: Viscosity:	16500 - 18000 cps (TBAR B @10 rpm)
Product description:	Lamination Lifting Cream in sachets.
Testing:	No animal testing, manufactured in accordance with GMP.
 Stability data: Where to be found:	Marked with 12M Minimum durability after first opening: For Immediate Use
Batch code Location:	

**Product Information**

**No.2 The Laminate**

Product identifier/Trade Name:	<b>No.2 The Laminate</b>
Intended Purpose:	The product is considered as a " Brow & EyeLash neutralising Product". Its purpose is to neutralise the effect of eye lash curling cream from alkaline condition and for professional use only. For external application only.
Appearance, colour and texture:	Lemon Coloured Lotion
Ingredients:	Aqua, Sodium Bromate, Urea, Calcium Sodium Borosilicate ,Glycerin, Theobroma Cacao Seed Butter, Panthenol, Glyceryl Stearate, Glycyrrhiza Glabra Root Extract, Equisetum Arvense Extract, Xanthan Gum, Phenoxyethanol, Peg-100 Stearate, Parfum, Ethylhexylglycerin, Citric Acid, EDTA, Sodium Hyaluronate
Specifications: pH:	6-6.5 (@ 25°C)
Specifications: Viscosity:	16500 - 18000 cps (TBAR B @10 rpm)
Product description:	Lamination Neutralising Lotion in sachets.
Testing:	No animal testing, manufactured in accordance with GMP.
Stability data:	Marked with 12M
Where to be found:	Minimum durability after first opening: For Immediate Use
Batch code Location:	

**Product Information**

**No. 3 Nourishing Elixir**

Product identifier/Trade Name:	<b>No. 3 Nourishing Elixir</b>
Intended Purpose:	The product is considered as a " Brow & EyeLash; Leave on Product". Its purpose is to moisturise the lashes after treatment. For external application only.
Appearance, colour and texture:	Clear Viscous Liquid
Ingredients:	Aqua, Glycerin, Panthenol, Xanthan Gum, Hydrolysed Silk, Phenoxyethanol, Aloe Barbadensis Leaf Juice Powder, Ethylhexylglycerin, Sodium Hyaluronate, Althaea Officinalis Leaf/Root Extract, Arnica Montana Extract, Prunus Armeniaca Fruit Extract, Rosmarinus Officinalis Leaf Extract, Chamomilla Recutita Flower Extract, Potassium Sorbate, Sodium Benzoate, Citric Acid
Specifications: pH:	5-6.0 (@ 25°C)
Specifications: Viscosity:	250-700 (TBAR B @10 rpm)
Product description:	Lamination Moisturising Serum in sachets.
Testing:	No animal testing, manufactured in accordance with GMP.
Stability data:	Marked with 12M
Where to be found:	Minimum durability after first opening: For Immediate Use
Batch code Location:	

**Product Information**

**Brow & Lash Bonding Serum**

Product identifier/Trade Name:	<b>Brow &amp; Lash Bonding Serum</b>
Intended Purpose:	The product is considered as a GLUE. A mixture. For external application only.
Appearance, colour and texture:	Clear Viscous Liquid
Product description:	Lamination Moisturising Serum in sachets.
Testing:	No animal testing, manufactured in accordance with GMP.
Stability data:	Marked with 12M Minimum durability after first opening: 12 months
Where to be found:	
<b>MSDS</b>	
1. Hazard Identification:	Inhalation : Vapor can cause headache, Nausea and irritation of the nose, throat and lungs. - Skin Contact : Slightly irritating to the skin. - Ingestion : May cause pain, nausea and vomiting. - Eye Contact : Contact with vapor or liquid may irritate the eye.
2. Ingredients:	Aqua (Water), Polyvinyl Alcohol, Phenoxyethanol, Ethylhexylglycerin, Peg-40 Hydrogenated, Caster oil, Glycerin.
3. Hazardous ingredients :	This product does not contain substances to be mentioned according to EU Regulation No 1907/2006 (REACH), annex II.
4. Accidental Release Measures:	Absorb small quantities on inert absorbent (e.g,sand) and scoop into settle container.

**Product Information**

**Brow & Lash Bonding Serum**

**Cont'd.**

4a. First Aid Measures:	<p>Eye Contact-Immediately flush eyes with running water for at least 15 minutes. If redness, itching or a burning sensation develops, see a physician.</p> <p>Skin Contact-Remove contaminated clothing/shoes and wipe off excess from skin. Wash exposed area with soap and water</p> <p>Inhalation-Remove victim to fresh air and provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get medical attention immediately.</p> <p>Ingestion- Get medical attention immediately.</p>
5. Dangerous Decomposition Products	Thermal decomposition may produce carbon monoxide, acrid fumes, and nitrogen oxides.
6. Exposure Controls / Personal Protection:	<p>Respiratory - Ensure adequate ventilation if spraying.</p> <p>Eye Protection - Wear safety glasses.</p> <p>Skin Protection - Wear neoprene gloves.</p>
7. Physical & Chemical Properties: Boiling Point:	
Boiling Point:	100'C
Flash Point:	> 87'C
Specifications: pH:	8.0 (@ 25'C)
Specifications: Viscosity:	3000-700 mPa.s
8. Hazardous Decomposition Products:	<p>Thermal decomposition may yield acrylic monomer, carbon monoxide and carbon dioxide.</p> <p>Unidentified organic compounds in fumes and smoke may be formed during combustion.</p>
9. Additional Regulatory Information:	Safety Phrases : 37

Cont.d	
Applicable to ALL Products	
Storage conditions:	Store in a dry place not above room temperature.
Particular precautions according to EU Cosmetics Regulations:	<p>For professional use only.            Read label before use. Read and follow instructions            Keep out of reach of children.            Wear protective gloves.            This product can cause severe allergic reactions.            This product is not intended for use on persons under the age of 16.            Eyelashes shall not be coloured if the consumer:                -has a rash on the face or sensitive, irritated and damaged scalp,                -has experienced any prior reaction after colouring hair or eyelashes.            Dispose of contents and container in accordance with all local, regional, national and international regulations.</p>
Additional information:	<p><b>The product may cause an allergic reaction. We recommend an allergy test (Patch test) 48-72 hours before the first application as well as after periods without tinting.</b></p>
Disclaimer:	<p><b>For cosmetic products no Safety Data Sheets (MSDS) are required by European (EC) law.            This document is not a Safety Data Sheet (MSDS) in the sense of European (EC) chemicals legislation.            It is given voluntarily and only for information of customers.            We will take no liability for any consequences of improper use or misuse of our products.</b></p>

**Application Procedure:**

Before any application::	• Complete client consultation sheet
Prep:	• Position client comfortably
Prep:	• Protect client's hair with a head band or mop cap and drape a towel or bed roll over the client's upper body to protect clothing
Prep:	• Take a before photograph
Prep:	• Sanitise your hands
Important Prep:	• Before opening sachet; Sachets to be gently massaged before opening and to be decanted into glue ring before use.
<b>Note:</b>	<b>The treatment time varies depending on the individual client's brows.</b>
Prep:	• Remove any traces of make up using an oil free make up remover and a clean cotton pad, place cotton pad in bin
Prep:	• Comb through the brows using a disposable mascara wand, put the mascara wand to the side for later in the treatment
Application:	• Apply a thin coat of bonder slowly and carefully straighten the hair, setting the hair in the right direction and shape with the mascara brush. Ensure sparse areas are covered, curly hairs are straightened, and brow hair is in the right direction to add shape and definition to the brows
Application:	• Apply a thin coat of no 1 to the brow hair, make sure you are applying closer to the roots if you want the hair to be set in the right direction after procedure, or to the entire hair if you want to soften thick hair and straighten curly strands. Leave on for appropriate time, depending on the thickness and density of the hair.
Processing time:	• Very fine brows 3-4 minutes
Processing time:	• Fine or tinted brows 4-5 minutes
Processing time:	• Natural healthy brows 5-6 minutes
Processing time:	• Course healthy brows 6-7 minutes
Removal:	• Remove using a clean cotton bud, place used cotton bud in bin
STEP 2 -	• Apply a small amount of Neutralising lotion to where the step 1 was applied using a micro-applicator
Processing time:	• Very fine, fine and tinted brows 5 minutes
Processing time:	• Natural healthy and course healthy brows 6 minutes
Removal:	• Remove using a clean cotton bud, place used cotton bud in bin
	• Comb brow carefully with a brow brush, following its shape and hair growth.
OPTIONAL COLOUR BOOST AND WAX	• Prepare chosen colour of tint and apply using a tint brush.
Removal:	• Remove tint after 1-3 minutes using a clean cotton bud, place used cotton bud in bin, wax eyebrows to desired shape.
STEP 3 -	• Apply moisturising serum over the brows using a micro-applicator
	• Take an after photograph.
Aftercare:	• Explain aftercare to client and give them a printed copy to take away along with a mascara wand.

**Beneficial Ingredients**

Beneficial Ingredients	
	Lash/Brow Lifting Cream – Step 1
Urea	is an Active Penetration Enhancer which enables deeper penetration of Biotin, Hydrolised Silk and Vitamin B3 into the hair follicles strengthening, and conditioning the lashes whilst also creating the ultimate lash lifting treatment.
Cocoa Butter	this helps to moisturise and give your lashes a silky shine
Biotin	is known to strengthen the keratin bonds within the hair follicles, strengthening the lashes and enhances hair elasticity which enhances the lash lift.
Hydrolised Silk	Silk is a protein derivative that is highly hygroscopic with an enhanced moisture binding ability. Free amino acids are known to penetrate the upper layers of the skin as well as through the hair cuticle into the hair shaft. This action draws moisture into these areas improving skin and lash hydration.
Vitamin B3	is known to stimulate hair growth and has been included in the formula to aid lash growth and provide fuller lashes.
	Lash/Brow Neutralising Cream - Step 2
Hyaluronic Acid	is well known for its moisturising and smoothing properties included in the formulation to moisturise and condition the lashes.
Glass Microbeads	promote optical blurring effect. They have also been included in the formulation to separate lashes after application. The microspheres enable a ball bearing effect creating less friction between lashes.
Panthenol	penetrates the cortex of the hair shaft within the lashes which can help repair damage caused by perming and colouring and is also known to slow down the hair aging process which can be caused by repeated grooming.
Liquorice and Horsetail Extracts	to aid lash growth.
	Moisturising Serum – Step 3
Marshmallow Extract	helps to detangle the lashes helping them to spread more evenly.
Aloe Vera	to condition the lashes and skin which promotes smoothness and shine.
Rosemary	have anti-inflammatory benefits and help soothe the skin.
Amica Montana	have anti-inflammatory benefits and help soothe the skin.
Apricot Extracts	have anti-inflammatory benefits and help soothe the skin.

**Medical Conditions Affecting Suitability For Treatment**

Herpes simplex/eye infections/ folliculitis	Not suitable for treatment whilst infected
Psoriasis/Eczema	Not suitable for treatment if in the treatment area
Conjunctivitis	Not suitable for treatment whilst infected
Alopecia	Not suitable for treatment.
Pregnant or breastfeeding	There is no evidence based research to confirm if certain products could affect an expectant mother or baby therefore not recommended for pregnant women as a safety precaution.
Recent Lasik Surgery.	Must wait 6 weeks after the 2nd procedure.
Folliculitis	Must wait 4 weeks after 2nd procedure.
Recent Permanent Make up - Must wait 4 weeks after 2nd procedure.	Recent Permanent Make up - Must wait 4 weeks after 2nd procedure.
Sunburn	Not suitable for treatment.
Very sensitive skin	Not suitable for treatment.
Clients who have cuts, abrasions, inflammation or swelling in the treatment area	Not suitable for treatment.
Clients have experienced a positive reaction to the patch test.	Not suitable for treatment.
Cancer -	The brows need some extra TLC and babying during chemo and the recovery period, which varies from client to client. It's important not to put any extra stress on lashes. It's best to refrain from treatment during chemotherapy, and several months after the clients last treatment, as the lashes are still susceptible to the effects of the drugs. Ideally, you'll want to wait until the natural lashes are less fragile. A letter from GP stating the client is suitable for treatment must be obtained and kept with their records. Under the influence of alcohol or drugs

**GMP Certificate 2021 .**

**GLOBAL BEAUTY PRODUCTS LTD**  
**Certificate of GMP 10/01/2021**

**Good Manufacturing Practice (GMP)**

**Article 8**

Article 8 of the Cosmetics Regulation (EC) No. 1223/2009 requires that the manufacture of cosmetic products shall comply with good manufacturing practices in order to ensure a high level of protection of human health.

**What Is GMP?**

GMP is a quality management tool – a set of principles designed to ensure the appropriate standards of quality, hygiene and safety are maintained throughout the manufacturing process and that the end product is fit for purpose.

The CTPA (Cosmetic, Toiletry & Perfumery Association) identifies the following criteria which must be satisfied if a product is to be considered fit for purpose:

- Is it the right product?
- Does it meet all the regulations for that product?
- Was it developed correctly?
- Is it manufactured to the correct formulation?
- Is it free from contamination?
- Is it in good condition (no spoilage or breakdown)?
- Is it in the right container?
- Does it satisfy the weight declaration?
- Is it correctly labelled?
- Is it properly sealed in its container and protected against damage and contamination?

**Why is GMP Important?**

Besides being a legal requirement, GMP greatly reduces the risk of a product being placed on the market in a sub-standard or unsafe condition. Failure to adhere to GMP could potentially result in product recall, a costly and damaging process which can have a seriously negative effect on the confidence and goodwill of consumers and retailers alike. It could also adversely affect liability insurance premiums or invalidate insurance cover.

**GLOBAL BEAUTY PRODUCTS LTD**  
**Certificate of GMP 10/01/2021**

**GMP Standards**

There are various GMP standards in existence, including Council of Europe GMPo, CTPA GMP guide. We work to the best principles of all these standards and principles.

**HACCP**

For our purposes our production team also incorporate the principles of HACCP which is a systemic preventative approach to achieve product safety and quality, consistently.

**GMP at GBP Ltd**

GBP's customers can rest assured that all products are manufactured to the highest standards of GMP for all our products.
